EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bruce Cottrell on March 28, 2007.

The application has been amended as follows:

Claim 1, line 13, --for magnetizing said magnetic microspheres—is inserted after "first magnet".

Claim 1, line 16, --to—first occurrence is deleted.

The following is an examiner's statement of reasons for allowance: the prior arts fail to teach a process of separating a sample comprising attaching a different receptor agent to at least two distinct populations of magnetic microspheres with a specific range of magnetic moments, wherein each of said magnetic microspheres includes a plurality of magnetic particles, and wherein said magnetic particles are either coated, imbedded in said magnetic microspheres, or immobilized on a surface of or within said magnetic microspheres; combining a target sample with said distinct populations of magnetic microspheres containing the different attached receptor agents together for a period of time sufficient to allow for binding between attached receptor agents and target species within said target sample to form one or more receptor agent-target species complexes; and sorting said distinct populations of magnetic microspheres containing the different

receptor agent-target species complexes by passing said magnetic microspheres through a first magnetic field provided by a first magnet for magnetizing said magnetic microspheres to a chamber and a collector, wherein the chamber and the collector are disposed in a second magnetic field provided by a second magnet, and wherein said magnetic microspheres having different magnetic moments are separated in the chamber in the presence of the second magnetic field according to trajectories determined by their respective magnetic moments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pensee T. Do whose telephone number is 571-272-0819. The examiner can normally be reached on Monday-Friday, 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
